The Universe is Indestructible

Shovanlal Kundu and Krishnendu Das Gupta

I. Introduction :

What is a Black Hole ?

      A Black Hole is a region in space – time from which gravity prevents anything , including light , from escaping .The General Theory of Relativity predicts that a sufficiently compact mass will usually deform space – time to form a black Hole. Around a Black Hole there is a mathematically defined surface called the **Event Horizon** that marks the point of no return. The hole is called " Black" because it absorbs all the light that hit the horizon , reflecting nothing, just like a black body, with a finite temperature !

Fig (I)

      The work that Roger Penrose and Stephen Hawking did between 1965 and 1970 showed that , according to general relativity, there must be a **Singularity** of infinite density where time becomes zero . This remarkable fact led Roger Penrose to propose the cosmic censorship hypothesis, which can be paraphrased as "God abhors a naked singularity". In other words, the singularities where no law holds, occurs only in black holes.

      An **A**ccretion Disk** is a structure (often a circumstellar disk) formed by diffuse material in orbital motion around a massive central body. The central body is typically a star or a black hole. Friction causes orbiting material in the disk to spiral inward towards the central body.

      Relativistic jets (Through which our Pixel – Boats shall move!) are beams of ionized matter accelerated close to the speed of light. Most have been observationally associated with central black holes of some active galaxies , radio galaxies or quasars, and also by galactic stellar black holes, neutron stars or pulsars .These material may be from the accretion disk !

Theory Part I : As we know , with increase in mass in a black hole time slows down , and with infinite mass , Y(Relativistic Time) = 0 , its easy to assume a simple but effective relation with mass and time , such as

$$M = \frac{K}{Y}$$, where M = relativistic mass of the black hole or a small mass such

as a electron in kg

Y = relativistic time in secs

$\underline{K}$ = Kundu constant , in case of a electron = $1.436{\times}10^{-13}$ kg $-$ sec .
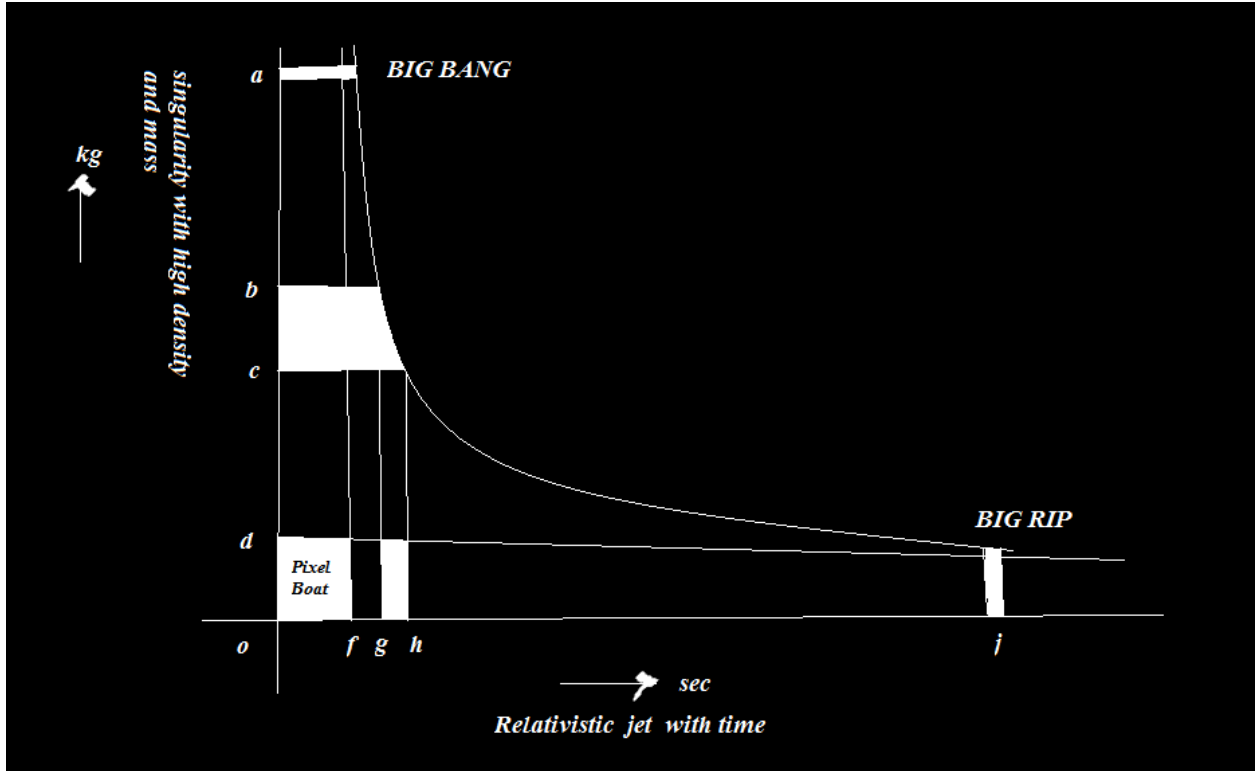

Its easy to see that if M → 0 , Time Y → ∞

Fig (II)
a = $1.436{\times}10^{30}$kg , at f = 10^{-43} seconds after big bang , the mass of a electron has crossed the Chandrasekhar's Limit , perhaps this may be one of the cause of big bang !When we decide to escape Dark Materialism, but not Knowledgeable Materialism in Pixel Boats (mass of a pixel of 32 bits is $1.3875{\times}10^{-24}$kg represented by point dof).

Theory Part II : We here introduce the concept of ' Character Equations'(as because the world is created by y $-$ photon , the solar rays reaching us) which are equations that we cannot differentiate (we have to take the whole , not ' black hole' ! which being part of the universe) ,in other words we should not digitize a character equation , thus writing ,

$$T (Feeling) = \frac{X}{Y}$$ is valid , where X represents Relativistic love and Y

Relativistic Time , and they are representative of Chromosome X and Y , either you take the whole of the X or don't take, similar for Y . Here we show a graphical representation of what we have understood of the above equation : T (Feeling) = $\frac{X}{Y}$,
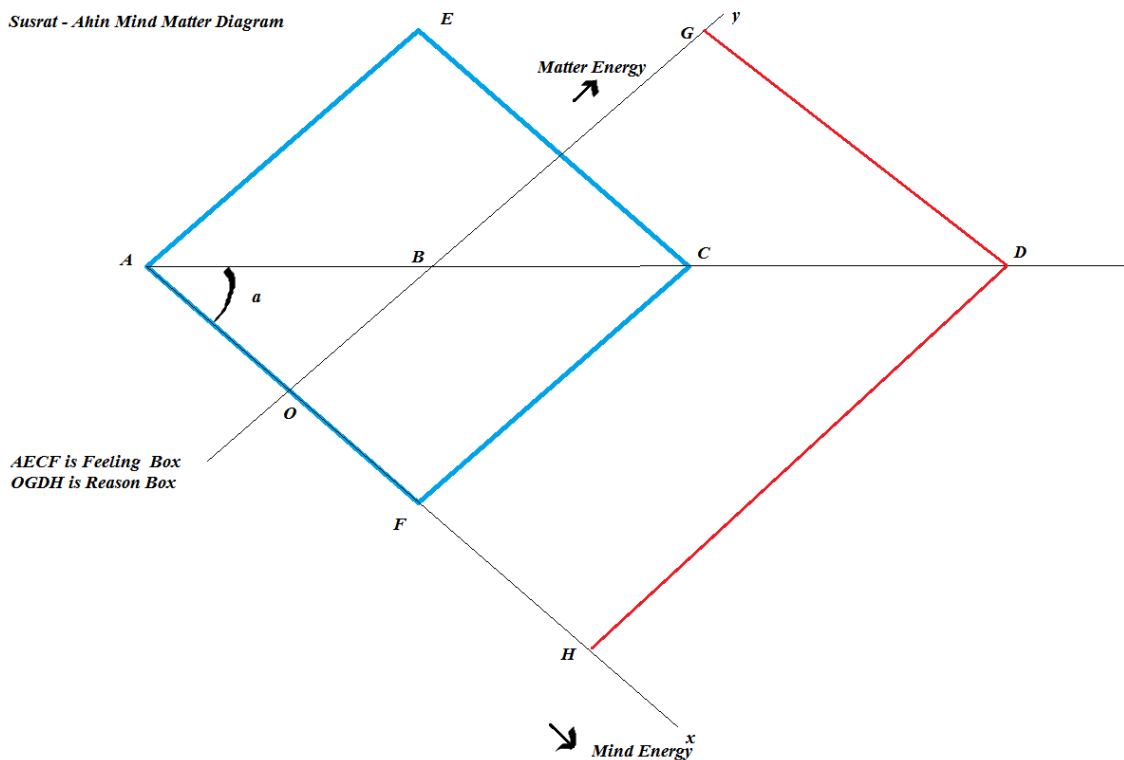

Our world is created by reflection of chit $-$ jagat, in which T is eternal feelings where infinite love or wholesome love for sachitananda (the self, or the Brahman or Tao)is infinite too !

Susrat - Ahin Mind Matter Diagram

Matter Energy

AECF is Feeling Box
OGDH is Reason Box

Mind Energy

Fig(IV)

Ǝ: Atomic Scale

a = 80.9569^0

A $=\left(-\frac{W_0}{2\pi}, 0\right)$, B $=(0, W_0)$, C $=\left(\mathbb{C}-\frac{W_0}{2\pi}, Æ\right)$, D $=\left(\mathbb{C}, \mathbb{C}+\frac{W_0}{2\pi}\right)$

W_0 = 1 amu energy units = 1.492×10^{-19} Joules

$Æ = 2\pi\mathbb{C}$ = Ahin Energy or pure matter love energy

$\mathbb{C}$ = Susrat energy = 8.8665×10^{-18} Joules ; ABCD is Susrat – Ahin Mind - Matter Line

Whose equation is $X_{Ma} = 2\pi X_{Mi} + W_0$, where X_{Ma} = Relativistic Love - matter energy and X_{Mi} = Relativistic Love - Mind energy . If we divide the equation by Y we get $T_{Ma} = 2\pi T_{Mi} + T_0$.

If we measure Relativistic Love in Joules or energy units T or feeling is Joules per seconds .During the Covid LOCKDOWN our feeling tended towards zero as time seemed to tend towards infinity!{ T (Feeling) = $\frac{X}{Y}$ }.

Time or Y seemed to have stopped and negative emotions like fear reigned everywhere!

II.   Conclusion :

Since we have begun writing ' Character Equation' we have to take the whole of X and whole of Y . Therefore we need to consider a system which we take as whole , namely : The Feeling Box and the Reason Box ! By

changing the Universal set ∃ , we can Geographically think of love as energy to be spread ,beginning from our neighbors and neighborhood nations !
