

International Journal of Research in Engineering and Science (IJRES)

e-ISSN : 2320-9364

Volume : 11 ~ Issue : 01

p-ISSN : 2320-9356

Contents :

The Influence of Hot & Cold Rolling and Hot-Dip Galvanizing Process on the Mechanical Properties and Microstructure of Low Carbon Steels	01-05
A Study on Direct Marketing as the Most Effective Form of Marketing	06-10
Energy conservation on the basis of structure of bacterial genome	11-12
Further Results on Strongly Perfect Graphs	13-19
Effect of Welding Process on the Hardness Characteristics of Welded and Heat-treated 304L: Statistical Approach	20-27
Exploring the Potential of Blockchain Technology in the Construction Industry: Applications and Implications	28-43
An experimental on office comfort of intelligent cockpit based on subjective evaluation	44-54
The Design and Fabrication of an Improved Diesel Powered Hydraulic Red Brick Molding Machine	55-62
Rssi Based Trilateration for Outdoor Localization in Zigbee Based On Smart Helmet	63-67
Generation of Irregular Satin and Sateen Weaves	68-77
Analysis of Carbon Emissions of HVAC Systems for Public Buildings in China based on LCA	78-85
Design of self-tuning PID controller using fuzzy logic for DC motor speed	86-92
Obtaining Measurements of Mineral Ore Using Image Processing	93-104
Finite Element Simulation of Precast Concrete T-beam and Column Joints with Floor Slabs	105-110
Alum as a greener catalyst in Organic Synthesis	111-112
