Contents :

Analysis and Design of G+6 Building System Using STAAD Pro Software	01-09
Selective Sorption Of Pentavalent Vanadium Ions From Aqueous Solutions Using V(v)-Ion-Selective Imprinted Polymer	10-13
Review on Application of Machine Learning On the Study of Cement- Superplasticizer Compatibility	14-18
A Review on Effectiveness and Compatibility of Superplasticizers In The Presence Of Mineral Admixture in Cementitious System	19-22
Vertical Buildings	23-25
A Stemming process in Sentiment Analysis for Social Media Tweets	26-30
Smart FIR: Securing e-FIR Data through Blockchain	31-36
Exploration of Multi-Bay Steel Frames for High-Rise Buildings using Seismic Design	37-42
Therapeutic Penetrating Keratoplasty: Indications and Surgical Outcome	43-46
Fake News detection system using TF-IDF	61-67
Review on Durability Performance of Fly Ash and GGBFS Based Alkali Activated Concrete	68-73
Comparative study of Junction-less Field Effect Transistors for Short Channel Effect	74-79
Helmet detection system using Mask R-CNN	80-87
CROWDFUNDING- A new fundraising platform	88-93
