

International Journal of Research in Engineering and Science (IJRES)

e-ISSN : 2320-9364

Volume : 13 ~ Issue : 03

p-ISSN : 2320-9356

Contents :

Experimental Study on the Properties of M25-Grade Recycled Aggregate Concrete	01-06
Research on simulation and optimization of light density gas based on replenished air hood	07-16
Analysis of Employee Discipline as a Determinant of Public Service Performance: A Case Study at the Social Service of Gorontalo Province	17-22
Dimensionless Modelling of Piezoelectric Energy Harvesting with d33-mode Multilayer Piezoceramics using Mass-Spring Oscillator	23-29
Black Myth: Wukong" Game Promotes the International Communication of Chinese Traditional Culture to the Enlightenment of the Internationalization of Chinese Gaming Culture Industry	30-32
Electroless Deposition of Metal Hexacyanoferrate on Carbon nanotube Supported Electrode for Electrocatalytic Sensing of Ethanol	33-36
Comprehensive Review on Algal Blooms: Characteristics, Causes, Hazards, and Resource Utilization Strategies	37-48
Environmental and Agricultural Sciences in Sanskrit Literature	49-52
Production of Lactic Acid from Orange Wastes	53-58
Dynamics of Human Migration Using Machine Learning Algorithm	59-63
Analyzing Learning Mode Preferences Using Machine Learning	64-66
Blood Pressure Category Using Machine Learning	67-69
Prediction of Student Performance Using Machine Learning	70-72
Empower To Employ: Essential Skills for Career Success Using Machine Learning	73-75
Customer Satisfaction Analysis Based On Travel Mode Preference Using Machine Learning	76-78
