Volume : 13 ~ Issue : 05 ~ Ser. 2

p-ISSN : 2320-9356

Contents :

Effect of nitriding time and temperature on case depth in AISI H13 steel	111-119
Dynamic Transient Analysis and Structural Weight Reduction of an Aircraft Wing using HyperMesh	120-126
A Note on the Vorticity of MHD Flow Through A Porous Medium Bounded By An Oscillatingporous Plate	127-132
Investigated the flank wear of high CBN inserts in the fully interrupted hard turning process	133-139
Performance Evaluation of the Nigeria Power System Dynamics Using Distributed Generator	140-149
Prayer about prayer in German and SWA-algorithm	150-152
Energy Efficiency Analysis of Green Building in the Construction of Anutapura Hospital Building, Palu, Indonesia	153-158
Design of an Adaptive Intelligent Planting Machine for Tuber Crops	159-161
Research on the Impact of Industrial Policies on the Operating Efficiency of Coal Company Based on Data Analysis	162-167
Enhancing the Privacy and Security in Federated Learning through Advanced Cryptographic Techniques: A Literature Review	168-173
