

International Journal of Research in Engineering and Science (IJRES)

e-ISSN : 2320-9364

Volume : 14 ~ Issue : 07

p-ISSN : 2320-9356

Contents :

Design and implementation of an integrated hospital information system in an anonymised private clinic: a UML approach and MVC architecture	01-12
Re-evaluating Contemporary Vāstu Practices A Critical and Empirical Study of Non-Classical Ritual Constructs, Yantra/ Pyramid Installations, and Diagnostic Methodologies	13-20
Construction Material Supply Chain Risk Analysis on Dam Consolidation Projects at Miu River and Tuva River Using the Monte Carlo Simulation Model	21-32
Slope Stability Assessment and Remediation of a Landslide-Prone Road Section: A Case Study of the Paleleh–Lokodoka Road, Central Sulawesi, Indonesia	33-40
Inputs For Political Stability In 1kings 12: Rethinking the Efficacy of Youth Advocacy in Africa Today	41-49
Efficiency Properties of the Stein-Minimax Estimators Under Actual value Prediction	50-59
Integrated Rock Mass Characterization and Slope Stability Assessment of Andesitic Rock Slopes in Watusampu, Central Sulawesi, Indonesia	60-69
Restoration of Obliterated Chassis Number of Stolen Truck by Chemical Etching Method: A Case Study	70-73
Potential connections between English teaching research and practice: The writing momentum of researchers and teachers	74-77
Typology of Backyard Transformations into Multifunctional Zones in Permanent Housing at Tondo 1, Palu City	78-83
A Confidence-Guided Optical Flow Alignment Framework for Multi-Frame Super-Resolution	84-93
Enhancing Multi-Frame Super Resolution Using Optical Flow Based Alignment, Conv LSTM Temporal Fusion and Artefact Controlled Reconstruction	94-103
Decomposing the Driving Factors of Tourism Carbon Emissions: An Empirical Study Based on SHAP Machine Learning Analysis and Its Policy Implications	104-111
A Simplified Analytical Method for Assessing Pressure Vessel Nozzles Subjected to Imposed Piping Loads	112-126
Evaluation of Energy Saving Potential at the Nurul Yaqin Mosque in Palu City through the Implementation of Passive Systems	127-137
