

Contents :

Using Novel Low Cost Adsorbents to Remove Some Organic Dye from Waste Water	01-18
An IoT Based Health Monitoring System Using Raspberry Pi	19-24
Survey On Integrated Approach for the Analysis of users' future request by Web Mining	25-29
Bank Locker Security System Based On GSM and RFID	30-33
A Study of Landslide Classification Using Machine Learning Approaches	34-38
Study on the Strength Properties of Concrete with Demolished Waste as Coarse Aggregate	39-43
An Analytical Study of Knowledge Management Performance in Automobile Manufacturing Industry	44-50
Mysticism in the Religion of Zarathushta	51-54
Statistical validation of a PWM algorithm based on a linear equation applied on three-phase inverter	55-62
Downlink NOMA Networks in the Presence of Imperfect SIC: Receiver Design and Performance Analysis	63-67
Automatic Diagnosis System for Detecting Melanoma Using Local Binary Patterns	68-71
A Review: Smart and Innovative Techniques for Safe and Smooth Road Transport System	72-78
The Study of the Role of Pandemic Awareness Applications in A Global Public Health Emergency	79-81
Hybrid Fuzzy-Genetic Load Balancing Scheme for Cloud Computing	82-89
Rotating Shift Work That Effect Employees Health Conditions; A Case Of Pharmaceutical Industry, Jamshoro	90-96
