Big bang created our universe in the partition of second divide by 80,00,000 times Nano second.

1 Divine Nano is =300000 x 80,00,000

1 second light speed should multiply by 80,00,000

3,00,000 × 80,00,000=2,400,000,000,000 KM Big bang travels in one Nano second.

Distance =Time × Speed (Base)

1/80,00,000=1Nano second big bang time speed

Distance =Time × speed

Distance =Time × 1 big bang push in 1 micro second

Nano Distance =Nano time ×Nano speed =

1/80,00,000 × Nano Speed

Distance = 1 second/80,00,000

F=M ×a x a

F=M × 1second × 1 second

So 1 second/1 second =1 second

Also 1 second × 1 second = 1second

F/M=a ×a

Here a=1second ×1second

F=1,M=1

So 1/1=1 and 1×1=1

F=Force for 1 second

M=Mass used for only one second

Here F=M=a ×a

1big force =1big Mass =a × a per second

1second/80,00,000=1 Nano second

E=Mc2

1 second light travels 3,00,000KM

1 second speed should multiply by 80,00,000

3,00,000 × 80,00,000=2,400,000,000,000 KM Big bang travels in one Nano second.

1 second Divine Distance =1 Nano second divide partition value x 3,00,000

80,00,000 ×3,00,000 velocity of the light per second =2,400,000,000,000KM per second velocity of Matter spread while big bang to create the universe.

Now 1 Divine second of the universe is

2,400,000,000,000 KM per Earth second. 1 second of the Earth is 3,00,000 per Earth second.

So Universe second is 80,00,000 times greater than Earth's second.

Now F=M ×a ×a

I. INTRODUCTION

Time traveler Machine is 100% possible - Researched by Mr.Satish Mahadeo Gore

Based on F=Ma, E=Mc2, Shivpuran, ॐ=Mass,

Energy=Mother Shakti, Vishnupuran

Time traveler Machine is 100% possible - Researched by Mr.Satish Mahadeo Gore Teacher at Maharashtra Vidyalaya Bansarola.

Big bang created our universe in the partition of second divide by 80,00,000 times Nano second.

1 Divine Nano is =300000x80,00,000

1 second light speed should multiply by 80,00,000

$3,00,000 × 80,00,000=2,400,000,000,000$ KM Big bang travels in one Nano second.

Distance =Time × Speed (Base)

1/80,00,000=1Nano second big bang time speed

Distance =Time × speed

Distance =Time × 1 big bang push in 1 micro second

Nano Distance =Nano time ×Nano speed =

1/80,00,000 = Nano Speed Distance

Distance = 1 second/80,00,000

F=M ×a x a

F=M × 1second × 1 second

So 1 second/1 second =1 second

Also 1 second × 1 second = 1second

F/M=a ×a

Here a=1second ×1second

F=1,M=1

So 1/1=1 and 1×1=1

F=Force for 1 second

M=Mass used for only one second

Here F=M=a ×a

1big force =1big Mass =a × a per second

1second/80,00,000=1 Nano second

E=Mc2

E=M × 3,00,000 × 3,00,000 for 1 second Earth time

E/M=3,00,000 × 3,00,000KM

2E/M=C2

3,00,000×3,00,000

×3,00,000×3,00,000

÷3,00,000×3,00,000

=3,00,000×3,00,000=c2

1/80,00,000=0.000000125

1 second light travels 3,00,000KM

300000KM/80,00,000KM=0.0375KM Nano Distance

Light speed per second in KM/8000000 Nano seconds=0.0375KM Nano Distance

1 second speed should multiply by 80,00,000 to get big bang speed in KM

3,00,000 × 80,00,000=2,400,000,000,000 KM Big bang travels in one 1 second.

1 second Divine Distance =1 Nano second divide partition value x 3,00,000

80,00,000 ×3,00,000 velocity of the light per second =2,400,000,000,000KM per second velocity of Matter spread while big bang to create the universe.

Now 1 Divine second of the universe is

2,400,000,000,000 KM per Earth second as on the earth that is 300000KM per Earth second.

So Universe second is 80,00,000 times greater than Earth's second.

Now F=M ×a ×a

F=M × 2,400,000,000,000 × 2,400,000,000,000=5.76000000E+24=

2,400,000,000,000

× 2400,000,000,000

For our time Machine we are going to use Mass =3000KG

Now F=3000×

2,400,000,000,000

× 2,400,000,000,000

1 light years KM is

9,460,800,000,000KM

according to the Earth second time.

3.942 divine seconds are equal to our Earth's light year.

Means

1 light year ÷divine second =3.942 Divine seconds

9,460,800,000,000÷

2,400,000,000,000=3.942 Divine seconds

So God's total 3.942 seconds are our 365 days year.

Divine 1 second speed is universal 2,400,000,000,000KM per Divine The second on the Earth second/80,00,000

1/80,00,000=0.000000125 Nano seconds

Now

Divine minute =60×

2,400,000,000,000KM

per 1 Divine second

Divine 1 hour =

60×

60×

2,400,000,000,000

per 1 Divine second

Divine day =24×60×60

× 2400,000,000,000 KM per 1 Divine second

Divine year =365× 24×60×60×

2,400,000,000,000 KM per 1 Divine second

Now the Earth's

Minute

=60×300,000

Earth's 1 hour

=60×60×300,000

Earth's 1 day

=24×60×60×300,000

Earth's 1 year

=365×24×60×60

×300000=9,460,800,000,000KM = 1 Light year.

Within 3.942 Divine seconds We can travel in the space 1 light year in 3.942 Earth's second also.

3.942 Earth's seconds are = to 3.942 Divine seconds but Earth's speed is Light 3,00,000 KM per second. Divine seconds speed is fulfilled with 80,00,000 Micro seconds Speed of 3.942 seconds is 2,400,000,000,000 KM per Micro seconds.

We should one big bang Force in the rocket=3000KG Time Machine x 2,400,000,000,000 KM x 2,400,000,000,000 KM per Micro second

(5.76000000E+24=

You can change of the Mass of your Time traveler Machine .

Most important: You can make your own human being globe as the time traveler Machine . Balanced energy as a flue. Water recycling tools. Food production system. Soil and oxygen recycling system. Life management system. With the best human being environment.

On the top of time traveler Machine does not affect the gravitational force of the planets . The request by the Indian government to create the time traveler Machine .The speed can be reduced as little as and as much as desired. Only India can take the full space.

The best Qualities to soft land the time traveler Machine at every

planet in the universe.---

India's First Time traveler Machine is 100% possible- anti gravity 10 D technology soft Lander Researched by Mr.Satish Gore Sir

India First-Advanced anti gravity functional Lander system-The time traveler Machine

1) First Indian anti gravity technology the time traveler Machine will have ten master rockets in the interior. This will be used to speed up the speed of the rocket and speed slow of the Lander.

2) No gravitational force will be adversely affected on the head of the soft Lander.

3) The speed of the space ship can be 2 meters per second

4) We can create and reduce antigravity force by using 10 D rockets system.

5) We can control the speed of spacecraft and change its direction at any direction at any time.

6) Use automatic computers and robots command system .Radar system. Video telecast system. The first Indian Gravity Controller - Anti gravity

The laws of an Anti gravity of Satish Mahadeo Gore-

1) The first rule of Satish Mahadeo Gore gravitational force is to keep the force of the moving object in the opposite direction in order to control the speed of any moving object.

2) The second law of gravity controller Anti gravity of Satish Mahadeo Gore

The force should be increased in the opposite direction given to increase the speed. You can do more with the force of the direction of the original direction. The speed can be controlled.

3) The third law of gravity controller of Satish Mahadeo Gore. The gravitational force works as well. The opposite gravitational force also works. The law of stability - by conquering gravity by anti gravity, applied the same force over an object in ten directions, the object remains constant in the sky ..Basis Newton's theory of gravity. F = ma

First Indian anti gravity the time traveler Machine Soft Lander system The first Indian Gravity Controller – The law of Anti gravity-Researched by Mr.Satish Mahadeo Gore The law of anti gravity –Changing Directions and Soft lender's speed at any time automatic base If a soft Lander is going east with a force of ten, it will move east to force it to move west. Twenty rockets should be activated. 20-10 = 10 Now this same soft Lander will have to travel west with a force of 10 instead of east. Rockets west of this soft Lander were operated by ten forces. If they are slowing down the west side.

Example-If a soft Lander goes east with a force of ten,

Gravity effects on every object around the planet about limited distance.

(Earth gravity) 9.8/1.62 (Moon gravity)=6.049282716

To prove E=mc2

Let's create a new formula

NP=c2Xg

Earth NP=300000X300000X9.8=882,000,000,000

Moon NP=300000X300000X1.62=145,800,000

882,000,000,000÷145,800,000=6.049382716 is 6 times gravity more than moon.

So E=mc2 is 100% correct.

Let's fix anti gravity power pointers of the soft lander

On earth anti gravity point must create greater than 9.8 .On moon anti gravity point must greater than 1.62

Research Of Albert Einstein E=mc2 is 100% right solved with NPAF=c2Xg early researched by Mr.Satish Gore Sir India

To prove E=mc2

Let's create a new formula

NPAF=c2Xg hear g=gravity of any mass/planet/star (Replace and compare) Newton Power Attraction Force=NPAF

The Earth NPAF=300000X300000X9.8=882,000,000,000

Moon NPAF=300000X300000X1.62=145,800,000

882,000,000,000÷145,800,000=6.049382716 is 6 times gravity more than moon.

So E=mc2 is 100% correct.

Let's fix anti gravity power pointers of the soft Lander

On earth anti gravity point must create greater than 9.8 .On moon anti gravity point must greater than 1.62

The Sun compares with The earth about gravity

The Sun's gravity is= 274 m/s² The Earth's gravity is=9.80

The Sun's Newton Power Attraction Force 274÷ 9.8 The Earth's Newton Power Attraction Force =27.959186735 is greater than the Earth

Let's prove E=mc2

With a new formula

NPAF=c2Xg researched by Mr. Satish Gore

Sun's Newton Power= c2Xg=300000X300000X274=24,660,000,000,000

Earth's Newton Power Attraction Force = c2Xg=300000X300000X9.80=882,000,000,000

Now Sun's Newton Power Attraction Force ÷Earth's Newton Power Attraction Force Power=24,660,000,000,000÷882,000,000,000=27.95911836 735 is greater than the Earth

Sun's gravity 274 ÷ Earth's gravity 9.80

274÷9.8=27.95911836735= Sun's Newton Power Attraction Force ÷Earth's Newton Power Attraction Force =24,660,000,000,000÷882,000,000,000=27.95911836735 is equal

Lets create another Formula –

Greater Planet gravity ÷Smaller Planet gravity=Grater planet NPAF=c2Xg÷ Smaller Planet NPAF=c2Xg Newton Power Attraction Force=NPAF

c2=300000 X 300000 hear c2 is speed of light per second

KM
You can compare this with each mass in the universe. So
E=mc2 the equation of Albert Einstein is the
Universal truth and supported by new researched formula
NPAF=c2Xg
Distance=speed X time
